Local policy considerations

None

National policy considerations

9.42 – The authority’s decision should be evidence-based, justified as being appropriate for the promotion of the licensing objectives and proportionate to what it is intended to achieve.

9.43 – Determination of whether an action or step is appropriate for the promotion of the licensing objectives requires an assessment of what action or step would be suitable to achieve that end. Whilst this does not therefore require a licensing authority to decide that no lesser step will achieve the aim, the authority should aim to consider the potential burden that the condition would impose on the premises licence holder as well as the potential benefit in terms of promotion of the licensing objectives. However, it is imperative that the authority ensures that the factors which form the basis of its determination are limited to consideration of the promotion of the licensing objectives and nothing outside those parameters.

4.4 **Observations**

This premises also has the benefit of a Club Premises Certificate which has been suspended since 2014 for non-payment of the annual fee. Although Mr Maher is proposing to operate his business as a members' club he is not able to use the existing certificate because he is proposing to operate the club for his own profit (a proprietary club). Only members' clubs which are operated in such a manner that the profits are shared between the members (usually going back into running the club) are allowed a Club Premises Certificate.
