Dear Resident

**Re: Proposed Traffic Calming – Ashburton Road.**

Following the recent consultation we undertook to introduce speed cushions along Ashburton Road. We have now collated all the responses put forward. Out of all the properties consulted 25 properties took the opportunity to respond, 22 (88%) of which were in favour of introducing traffic calming.

With the above in mind we will put forward the proposal to introduce 75mm high flat topped road humps along Ashburton Road, please note the design, legal and construction process could take up to 6-8 months from today.

In the coming weeks the Council will visit site to confirm the exact location of the speed cushions, once this is confirmed the Council will write all residents affected by the proposed traffic calming prior to commencement on site.

If you would like to discuss the above in more detail please feel free to contact me on 01253 476162.

Yours sincerely,

**Traffic Management**
