Step 1 - Identifying the Purpose or Aims

1. What type of policy, service or function is this?

   New/ proposed

2. What is the aim and purpose of the policy, service or function?

The proposals are intended to support the management of a reduction in funding from the Government and other financial pressures which have led to a funding gap of approximately £9 million in 2019/20 and further pressures anticipated in future years, as set out in the Medium Term Financial Sustainability Strategy and in the main Executive report.

The purpose of this equality analysis is to:

1) Describe the work and decision making processes which assess potential impacts on key equality groups (protected characteristics) of the Budget proposals and highlight potential areas of adverse impact that could constitute discrimination.

2) Set out actions to ensure procedures are in place to continue to monitor and review the Equality impact of reduced revenue funding and consequent service and staff reductions.

Background and legal context

The Council has a statutory responsibility under section 149 of the Equality Act 2010, known as the “Public Sector Duty”. This requires a conscientious and systematic examination of impacts on equality issues on all relevant decisions. This is set within the context of our overarching requirement under Equality law, as a designated public authority to have “due regard” to the need to –

- Eliminate discrimination, harassment, victimisation and other prohibited conduct
- Advance equality of opportunity
• Foster good relations between different (defined) groups

**Council commitment to Equality and Diversity**

The Council’s priorities and commitments are contained in key publications a). The Equality Objectives  

These documents describe the importance of this agenda to the Council and set out four specific Objectives.

**The Council’s approach to Equality Analysis of the 2019-20 Budget proposals**

As with previous budgetary cycles the Council has implemented a multi-level approach to the equality analysis exploring the impact of the Budget decisions arising from the Government’s financial settlements.

This is in recognition of the complex effect on service users, staff, citizens and visitors of these decisions. This process involves a number of elements, key stages are summarised as:

**September – November 18**

- Initial service level proposals and scoping of equality issues. Focus is on the expected and known impact of service reduction proposals on key equality groups / protected characteristics; this work is led by Senior Managers responsible for the services, guided by advice by the Strategic Equality Manager. The work is to identify the scope of possible impacts, in order to inform Chief Officer’s deliberation and Elected Members selection of proposals to take forward to consultation.

- Detailed advice, guidance and standardised Pro forma paperwork for all key decision makers involved in the budgetary decision process.

- Briefing sessions with all Directorate heads to explore possible scope and impact of specific proposals on key Equality issues.

- Concurrently, initial engagement on the likely scope of the overall Budget position has been conducted with the Community wide Equality Engagement groups including the town wide Disability partnership and Faith Forum.

**December 18 – January 19**

- All budget related proposals with significant equality implications are identified to decision makers, an appropriate level of impact work is commissioned through data analysis and consultation with service users, and other stakeholders affected.

---

1 The Council’s Equality Objectives are:

- **Services** – We will deliver services that are fair – measured by more people telling the Council they experience fair treatment by Council services
- **Staff** – We will ensure that the workforce is more representative of the community the Council serves and equality and diversity is embedded in our staff culture
- **Decision making** – We will involve people from diverse backgrounds in decision making at every level
- **Cohesion** – We celebrate the growing diversity in Blackpool and increase respect and understanding for all
• Assessing staffing impacts. At this stage we are able to assess the effects of budget reductions on staff diversity issues. We do this by preparing a benchmark analysis of the current levels of workforce diversity for each of the key equality characteristics – Race, Gender, Disability, Age, Religion and Belief, and Sexual Orientation, as at 30/09/2018. This is then compared to the demographic profile of the pools of staff that have been placed at risk of redundancy through the specific service proposals, and any significant variances highlighted and investigated.

This work is important for two reasons, firstly, to ensure there is no discrimination through the selection process and secondly, to track our process in working towards a workforce that better represents the community we serve. The assessment forms the basis of discussion and consultation with staff representatives through the Trade Union JCC structures.

• At appropriate stages, all the above is communicated and discussed with senior decision makers at Chief Officer and Elected Member levels. This in turn informs the final decisions, which are included within the February Budget report.

Ongoing Departmental Equality review and compliance monitoring

To complement the specific analysis of budget related decisions, the Council operates a rigorous Equality performance and compliance process, which applies to all departments. This process aims to reinforce the annual work on budget equality analysis by focusing on the systems and procedures in place across the councils departments that ensure compliance with the Public equality duty, as well as wider good practice in equality and diversity.

3. Please outline any proposals being considered.

Funding and budgetary proposals as set out in the Executive report entitled General Fund Revenue Budget 2019/20 and in the report’s other appendices.

4. What outcomes do we want to achieve?

To manage the impact of a further large reduction in funding from the Government and other financial pressures which have led to a funding gap of approximately £9 million in 2019/20 and further pressures anticipated in future years as set out in the Medium Term Financial Sustainability Strategy.

5. Who is the policy, service or function intended to help/ benefit?

Many of the Council’s services specifically addressing social and economic inequalities and have a wide impact on inclusion and community cohesion in Blackpool.
6. Please summarise the main data / research

**Population Demographics**

The population of Blackpool is estimated as 139,870, with a larger proportion of residents aged 60+ compared to national age structure. Residents are mostly of White British ethnicity. Black and Minority Ethnic groups, including Irish and European residents, are estimated to make up 6% of the population approximately 8,500 people, compared with the estimated proportion for England of 20%.

According to the most recent estimates the population of Blackpool continues to gradually fall year on year. This goes against both the regional and national trend as the population of the North West and England are both seeing gradual increases each year.

The most recent data for Blackpool shows a higher percentage of residents who are described as separated or divorced, 12.5%, compared to 9.2% in the Northwest region and 8.7% in England & Wales.¹

**Age**

Blackpool has a slightly older demographic in comparison to the regional and national average with 19.2% of people over the age of 65 compared to 16.6% for the North West and 16.3% for England. The percentage of people who are of working age in Blackpool is below that of the regional and national averages with 63% of people aged between 16 and 64 compared to 64.6% in the North West and 64.8% for England. The number of people aged under 16 in Blackpool is also slightly lower.²
Race and Ethnicity

Blackpool has a predominantly white population with 94% of people describing themselves as White British compared with 80% for England. The Black and Asian community make up 3% of Blackpool’s population, whilst another 3% of the population are of Eastern European origin. According to the 2011 census 94.6% of people living in Blackpool were born in the United Kingdom as opposed to 91.8% regionally and 86.6% nationally. Of those born outside of the UK, the highest percentages were born in Europe (2.5%) and Asia (1.4%).

Gender and Transgender

Blackpool’s population is composed of 49.3% men and 50.7% women (similar to the national gender balance). The census does not currently include questions relating to Transgender. National Government estimates the total number of Tran’s people in the UK as within the range of 200,000 to 500,000. However, Blackpool has a significant LGBT community therefore; the numbers of transgender people who visit and live in the town are likely to be significantly higher than the national average.

Religion or Belief / Faith Communities

The majority of the Blackpool population are Christian, with 67.2% of people describing themselves as Christian compared with 67.3% in the North West and 59.4% in England. Over 24% of people in Blackpool describe themselves as having no religion. This is similar to the national figure of 24.7%. However, the percentage of people with no religion in the North West is smaller with only 19.8%.

The remaining population is relatively small with only 0.7% of people describing themselves as Muslim, this equates to just over 1,000 people in Blackpool. This is significantly lower than the figures for both the North West and England with 5.1% and 5.0% respectively. Blackpool also has lower proportions of its population who describe themselves as Buddhist, Hindu, Jewish and Sikh compared with the rest of the country.

**Sexual orientation**

There is anecdotal evidence to suggest that Blackpool has one of the largest gay and lesbian populations outside of the country’s largest cities. The 2011 Census shows that 0.5% of the Blackpool population aged 16 and over was registered as being in a same sex civil partnership. The figure for England and Wales was 0.2%. In 2017 there were 605 marriages carried out in Blackpool, 6.9% of which were same sex civil ceremonies.x

**Health and Disability**

Blackpool has poor life expectancy, with life expectancy for males the poorest in England at 74.2 years compared to 79.5 years for the rest of England. Life expectancy for females is equally poor, at 79.5 years, compared to 83.1 years for the rest of England – joint second with Manchester, with Middlesbrough being the lowest at 79.8x. The biggest contributors for both men and women are circulatory diseases, digestive diseases including cirrhosis, and respiratory disease. These three areas contribute over half of the overall life expectancy gap in Blackpool. Lung Cancer is also a significant contributor to Female Life Expectancyxi.

A high proportion of residents describe their health as “not good” and state that they have a “limiting long term illness”. In Blackpool 22.9% of working age people are classed as economically inactive, this is a similar figure to that of the North West and England which have 23.3% and 21.6% respectively of working age people as economically inactive. However, in Blackpool 45.5% of economically inactive people are classed as being ‘long term sick’ compared with half that for the North West and England which have 25.9% and 22.3% respectively.

Substance and Alcohol misuse is high, with alcohol-related death the highest in England for males and femalesxii (cirrhosis being one of the major drivers of the life expectancy gap). Admissions to hospital in Blackpool for alcohol related conditions are much more prevalent than the regional and national average. With 1,151 per 100,000 compared to 719 in the North West and 636 in England. xiii Further estimates suggest that the prevalence of problematic heroin and/or crack cocaine use in Blackpool was 20 per 1,000 populationsxiv. Blackpool has the highest drug prevalence rate across the region, and has the second highest rate nationally, second only to Middlesbrough.

The number of people registered with severe long-term mental health problems and who are actively accessing treatment is higher than the regional and national average. Blackpool’s prevalence of GP diagnosed depression is the second highest in the country at 13.5%,
significantly higher than the national average of 8.3%. Of Blackpool’s working population 375 (0.45%) are registered as having a borderline personality disorder, 294 (0.36%) have an anti-social personality disorder, 334 (0.41%) have a psychotic disorder. Just over 7% of the Blackpool population have two or more psychiatric disorders. NHS Blackpool CCG GP practices have some of the highest rates of prescribing antidepressants in England. Blackpool has the sixth highest rate of male suicide in England with 22.2 per 100,000 cases per year. \[xv\]

While not directly a health damaging issue, teenage birth rates in under 18 year olds are the third highest in England. In addition, Blackpool has a lower proportion of teenage pregnancies leading to abortion (35.4%) compared to England (51.8%).\[xvi\] This implies a greater relative proportion of teenagers go on to become parents. Teenage conceptions have associated risks for both parent and child’s health and social wellbeing.

The most recent figures show that over a hundred people in Blackpool are registered blind with nearly 200 registered as having sight impairment. Nearly 200 people are registered deaf or have a hearing impairment. According to the Department of Education most children with hearing and visual impairments are educated within the mainstream school system and do not generally attend special schools \[xvii\]

In 2017 there were a total of 95 children or young people with a statement of SEN (Special Educational Needs), and 553 EHC (Education, Health and Care) plans. This is approximately 1.4% of the Blackpool 0-25 population and slightly lower than the proportion for England (1.5%) and North West (1.6%). The majority of children with an EHC plan or Statement are of secondary school age with a strong peak in statements for 15-16 year olds. Studies have shown that SEN is more prevalent among boys than girls. This is reflected in the figures for Blackpool; 67% of all SEN pupils are boys compared to 33% girls. The most accepted explanation for this is the difference in prevalence of disabilities for example; boys are five more times likely to be diagnosed with Autism than girls. It may also be related to differences in child development with boys generally maturing at a slower rate than girls.

When looking at the number of children who require SEN support (children identified as having Special Educational Need but who do not have a statement or EHC plans) Blackpool supports around 2,861 children. This is around 15.1% of all pupils in Blackpool, higher than England (11.6%) and the North West (11.6%). This indicates that Blackpool has higher levels of SEN but that a lower proportion of these receive statements or EHC plans.

**Learning Disabilities**

The Blackpool population has a higher prevalence of learning disabilities compared to the national figure. In Blackpool 0.65% of the total population claim Disability Living Allowance for learning disabilities whilst the figure is only 0.57% for the whole of England.\[xviii\] There are relatively few children with severe learning difficulties in the mainstream education system; in Blackpool 25.1% of all special school SEN pupils have severe learning disabilities. In addition a large proportion (29.2%) of special school SEN pupils are considered autistic.\[xix\]
People with learning disabilities and autism are one of the most excluded groups in the community and more likely to be living in poverty than the general population, partially because they are less likely to be in paid employment. People with learning disabilities are at increased risk of many health conditions compared to the general population. Common problems include respiratory diseases, sensory impairment, gastrointestinal cancer, anxiety and depression and dementia.

**Poverty and Deprivation**

Blackpool has a large proportion of residents living in deprived areas and is currently ranked the most deprived authority in England under the Indices of Deprivation 2015, a higher rank than in 2010, (6th) 2007 (12th) and 2004 (24th), based on the ‘rank of average scores’ measure. Additionally, in the 2010 and 2015 Indices, Blackpool ranked 1st for the concentration of deprivation within the town.

Poverty is a significant factor in Blackpool. In 2014, Blackpool was ranked the 11th worst local authority for child poverty with 31.1% of children in Blackpool living in low income families. This is compared to an average of 19.9% of all children in England. Further analysis highlights that 62.8% of children in poverty live in lone parent families.

7. What are the impacts or effects for Key Protected Characteristics?

**General impacts covering protected characteristics**

In drawing together the detailed proposals the authority has been mindful of the need to assess the Equality impacts and wherever possible and mitigate any adverse effects on service provision.

Although the scale and continuing annual cycle of cuts have made it impossible to protect all services to the most vulnerable children and adults in our community, we have made these decisions having regard to the impact this will have on people who share protected characteristics, and have tried to mitigate and reduce impact, wherever we can.

The collective long-term effects on people and groups of combined service cuts alongside other government initiatives such as welfare reform are difficult to judge at this stage and will only really become apparent over time. The opportunity for these issues to be explored further through consultation and engagement with key community groups and service providers will be important in the period ahead.

The effect of the Budget in respect of the Council’s workforce diversity will continue to be measured
and assessed for the impact on the overall composition of employees, compared with the Blackpool population. This will help us to assess progress towards our target of becoming an employer that better reflects the composition of the community we serve.

**Specific impacts**

As the budget report explains, the approach is based on securing the Council's sustainability through implementing our Medium-Term Financial Sustainability Strategy (MTFSS). The plan makes clear that service reductions and cuts were the last resort and only considered after other options have been exhausted.

It is also recognised that continued year on year cuts to back office and professional support to front line services, can and does have a real impact on the response times and quality of front line public services. These impacts, although spread across all service users and residents, will affect vulnerable people and groups more, given that many Council services are disproportionately used by them.

As in previous years, some of the specific proposals taken forward at this stage could affect equality issues. These specific equality issues and impacts have been – and will continue to be - explored in detailed Equality Analysis, which has informed the final decision making process.

**Relationships between or within communities (cohesion)**

The continued reduction in Council funding for deprived communities across much of Blackpool will have an inevitable effect on services and support for these neighbourhoods, and therefore could add to the pressures and tensions within these areas. The Council will keep a close dialogue with key community groups and leaders, as well as engagement through our Fairness Commission and Equality and Faith forums - to monitor this, and react if / when required.

The Council will also continue to fulfil obligations and responsibilities in recording and monitoring Hate Crime and related incidents. Monitoring the levels and patterns of Hate Crime will be a very important means of tracing the effects on community tensions of the reductions in the wider public sector spend in Blackpool in the period ahead.

---

8. What do you know about how the proposals could affect levels of socio-economic inequality, in particular poverty?

Given the widespread and deep levels of deprivation in Blackpool, and the effects of multiple years of cuts to the Council’s revenue budget. Further cuts, can at best only serve to reduce the scope of the Council to address these matters. These issues have been considered by decision makers throughout this process, however in the final analysis the Council is obliged to set a balanced budget.

9. What can be done to improve the policy, service, function or any proposals in order to reduce or remove any adverse impact or effects identified?

Significant budget reductions on this scale, by there very nature, have an unavoidable adverse impact on service delivery and people. However, the decisions on individual service areas, as far as possible, have been made with regard to the impact on particular vulnerable groups and people sharing
protected characteristics.

The impact on staff sharing protected characteristics will also be equality monitored to ensure, groups do not suffer disproportional adverse impact due to this and make sure that our policies do not indirectly discriminate on people who share protected characteristics.

In due course, further Equality engagement will be important as the effect of combined service cuts are difficult to measure at this stage and will only really become apparent over time. The budget reductions over the last few years are unprecedented in scale and the opportunity for these issues to be explored further through consultation and engagement with key community groups and service providers will be important in the year ahead.

The effect of the reduction in budget in respect of the workforce diversity will be measured and assessed and the long term impact on the staffing profile in respect of the overall balance of the workforce will be tracked.

10. Consultation

Consultation briefings on the broad budget position facing the Council have been undertaken with the community equality groups during 2011/12, 2012/13, 2013/14, 2014/15, 2015/16, 2016/17, 2017/18, 2018/19 and 2019/20 budget cycles. The Council’s Director of Resources or his representative has often personally attended and briefed a number of these groups over this period.

Wider communication has also taken place via the Council’s extensive corporate communication methods – which include web site, social media, media briefings & press statements and interviews. In addition to the above, the Council has also undertake consultation with the third sector during September – November 2018.

Once the specific proposals were published in December 2018, detailed consultations with all affected stakeholders-amongst them staff, service users and other key stakeholders – have taken place. The outcomes of these consultations have been considered by key decision makers, and accordingly have informed the final proposals contained in the budget.

Consultation with the Trades Unions with regards to staffing issues has been embedded into normal working practices and has also met all formal consultation requirements.
