Cash - short-term net investments/(borrowing) balances:

Commentary on Cash Movements during the year:

The summary on the previous page provides a comparison of the actual cash receipts and payments compared to the forecasted cash receipts and payments.

During the first 4 months of the year the Council's net cashflow has resulted in a decrease in the level of temporary borrowing due to the receipt of front-loaded Government Grants. While temporary investment rates and temporary borrowing rates are low the treasury team will delay taking any new long-term borrowing to fund planned capital expenditure. The interest charged by Lancashire County Council on the Local Government Reorganisation Debt is lower than anticipated. As a result the delay in taking new long-term borrowing and the lower interest charge from Lancashire County Council mean that a favourable credit variance is once again forecast for 2014/15.

The chart of actual and forecast month-end balances shows temporary investment and borrowing levels throughout the year. The forecast shows the level of borrowing that may be required to cover planned capital expenditure up to 31st March 2015.
