To whom it may concern

I AM lead to believe that the Marton institute is possibly going to have its license reviewed due to Complaints from a small Minority of residents about noise from entertainment during the beer festival that was held there. I reside less than 100 yards from the institute & the noise emanating from the premises was no louder than a normal house party & caused me no inconvenience what so ever. The Marton is a hub for the local community, it caters for all ages, holding family days OAP's parties, themed evenings i.e halloween, xmas, easter etc it brings people of the local area together. There is never any trouble you see more Police at the local takeaways than at the institute. In this day & age clubs like this should be encouraged as most are closing, the club has been open since 1895 & that is an achievement on its own.
