

Blackpool CCG Performance Report April 2019 - March 2020

Area	Indicator	Org.	Target	2018-19	2019-20	Performance	No. of Excess Breaches	Comments
RTT ©	Patients on incomplete pathways treated within 18 weeks	BCCG	92%	81.67%	81.50%	↓	14,790	The Trust and Blackpool CCG did not achieve the RTT open pathway standard in 2019/20 at 81.50% below the target of 92%. It is important to highlight that the Trust did manage to reduce the waiting list size from 18,543 in 2018/19 to 16,504 in March 19/20. Integrated Care Provider (ICP) workstreams are in place which focus upon improving referral management, out-patient services, patient flow and theatre utilisation at the Trust. Work continues to be focused at specialty level to reduce the number of long waiting patients; this was compromised by the impact of the winter pressures and also the national decision to cease all non-urgent elective activity during the COVID-19 level 4 pandemic. A continuous programme of audit and validation is supporting the Trust Patient Tracking List management. This focuses across outpatient, diagnostic and waiting list elements of the pathway. Full Trust validation of the waiting lists continues to take place on a weekly basis together with ongoing clinical triage at Consultant level to ensure that all patients are treated in order of clinical priority.
		BTH	92%	80.86%	81.02%	↑	31,578	
RTT ©	Patients waiting for more than 52 weeks - Incomplete Pathways	BCCG	0	50	12	↑	12	There were twelve (12) Blackpool patients waiting more than 52 weeks for treatment in 2019/20 which has improved from the 2018/19 number of fifty (50). It is important to note not all these patients were being treated at Blackpool Teaching Hospitals but across hospitals throughout the UK. Blackpool Teaching Hospitals had seventeen (17) patients waiting more than 52 weeks in 2019/20 which has improved dramatically from the 2018/19 figure of one hundred and ninety seven (197).
		BTH	0	197	17	↑	17	
DT Waiting Times ©	Diagnostic Test Waiting Times - % of patients waiting 6 weeks or more	BCCG	1.00%	0.89%	2.54%	↓	494	Performance against the target for less than 1% of patients waiting less than 6 weeks for diagnostic tests has deteriorated in 2019/20 for Blackpool Teaching Hospitals and Blackpool CCG. The longest waiting times were for endoscopy, MR and CT scanning due to capacity and an increase in referral numbers of up to 31.5% for endoscopy. The Trust added in additional sessions to improve waiting times for patients and recruited additional staff to expand the capacity and resources available.
		BTH	1.00%	0.59%	2.18%	↓	524	

Area	Indicator	Org.	Target	2018-19	2019-20	Performance	No. of Excess Breaches	Comments
A&E ©	12 Hour DTA waits in A&E	BTH	0	300	347	↓	347	There have been a total of three hundred and forty seven (347) 12 hour decision to admit breaches at Blackpool Teaching Hospital in 2019/20. One hundred and eighty (180) of these breaches were Mental Health related and one hundred and sixty seven (167) were Medical. The Trust experienced an increase in 12 hour decision to admit breaches over the Winter period; consequently all areas of patient flow within the Trust were reviewed with the many actions implemented which included improvements in specialty responses to the escalation of patients, early escalation of patients with a mental health condition to Lancashire and South Cumbria Care Foundation Trust (LSCFT), implementation of the see in an hour/refer in an hour/move in an hour model. It is important to note that there has been a dramatic improvement in the number of patients experienced 12 hour decision to admit breaches in 2020/21 with only twelve (12) reported up to and including the 4 th August 2020.
	A&E 4 Hour waits	BCCG	95%	84.89%	85.22%	↑	6755	Although A&E performance for patients to be seen within 4 hours has improved in 2019/20, at 85.22% compared to 84.89% in 2018/19; it has not achieved the target of 95%. The Trust has focussed on improving patient flow and timely discharges within the hospital in order to improve the time patients are waiting within A&E. An escalation model is in place for all delays, long waiting patients are regularly reviewed and additional support was sought from the Midlands and Lancashire Commissioning Support team to improve patient flow throughout the hospital.
		BTH	95%	84.89%	85.22%	↑	6755	
Cancer Waits ©	% seen within 2 weeks of referral	BCCG	93.00%	84.70%	89.18%	↑	282	Performance against the 2 week Cancer waiting times targets has improved in 2019/20 for Blackpool CCG and Blackpool Teaching Hospital; whilst the 93% targets have not been achieved in year it is important to note that both the CCG and the Trust achieved the targets in February and March 2020. The Trust has focussed on undertaking additional sessions within the breast service and now has additional capacity and physical resources in place to enable this to be sustained.
		BTH	93.00%	85.02%	89.36%	↑	537	
	% seen within 2 weeks of referral – breast symptoms	BCCG	93.00%	34.15%	61.56%	↑	225	
		BTH	93.00%	32.04%	60.38%	↑	407	

Area	Indicator	Org.	Target	2018-19	2019-20	Performance	No. of Excess Breaches	Comments	
Cancer Waits ©	% of patients receiving definitive treatment	BCCG	96.00%	96.93%	96.59%	↓	0	Achieved.	
		BTH	96.00%	98.83%	98.45%	↓	0		
	31 Days % of patients waiting no more than 31 days for subsequent treatment – surgery	BCCG	94.00%	94.17%	89.36%	↓	9	Blackpool CCG did not achieve the 94% target for the % of patients waiting no more than 31 days for surgery in 2019/20. Nine (9) patients throughout the year were not treated within the 31 days spread across various Hospitals in Lancashire. The reasons for the breaches vary but include complex diagnoses, equipment breakdown and treatment delayed due to medical reasons.	
		BTH	94.00%	100.00%	100.00%	↔	0		
	% of patients waiting no more than 31 days for subsequent treatment – drug therapy	BCCG	98.00%	100.00%	99.33%	↓	0	Achieved.	
		BTH	98.00%	100.00%	100.00%	↔	0		
	% of patients waiting no more than 31 days for subsequent treatment – radiotherapy	BCCG	94.00%	98.44%	96.93%	↓	0	Achieved.	
	62 Days	* % of patients waiting no more than 62 days from urgent GP referral to first definitive treatment	BCCG	85.00%	80.36%	78.73%	↓	36	Performance against the 62 day for urgent GP referral to first definitive treatment standard has deteriorated to 78.73% for Blackpool patients in 2019/20 from 80.36% in 2017/18 and remains below the target of 85%. Cancer pathways have been reviewed at the Trust to provide additional patient capacity and robust patient tracking list management of all cancer cases is undertaken with any delays in pathways escalated to the Director of Operations and Executives.
			BTH	85.00%	82.18%	78.76%	↓	75	
		% of patients waiting no more than 62 days from referral from an NHS screening service to first definitive treatment.	BCCG	90.00%	87.50%	78.82%	↓	9	Performance for Blackpool patients and the Trust for waiting no more than 62 days from referral from an NHS screening service to first definitive treatment has deteriorated in 2019/20 to 78.82% from 87.50% in 2018/19 for Blackpool patients; and Trust performance has deteriorated to 61.45% in 2019/20 from 78.35% in 2018/19. Whilst both indicators remain below their respective targets it is important to highlight that the number of patients referred via this pathway is very low, only nine Blackpool (7) patients have not been seen within the timeframe set in 2019/20 for reasons which include complex pathways and inadequate capacity.
BTH			90.00%	78.35%	61.45%	↓	36		

Area	Indicator	Org.	Target	2018-19	2019-20	Performance	No. of Excess Breaches	Comments
	% of patients waiting no more than 62 days for first definitive treatment following a consultant’s decision to upgrade.	BCCG	85.00%	91.28%	88.67%	↓	0	Achieved.
		BTH	85.00%	92.40%	90.06%	↓	0	
North West Paramedic Emergency Service ©	Category 1 Mean Performance	BCCG	00:07:00	00:06:23	00:05:29	↑	Breach information not currently available	<p>NWAS performance for the most of the year remained challenged; this has been the case with performance across most other ambulance trusts nationally. Over the course of the year, NWAS and commissioners were working on a range of initiatives that were included in the 2019/2020 contract in relation to implementing transformational change. This included:</p> <ul style="list-style-type: none"> Embedding a jointly agreed roster review to ensure that resource and capacity is made available at times of peak demand. Supporting the Trust on its journey to implement a number of strategies especially in relation to digital transformation. Discussing with the Trust its approach to embedding recommendations from the Carter review into Ambulance services. Developing approaches to deliver Integrated Urgent Care to secure greater integration between 999, NHS111 and urgent care services delivered by other providers. This has included further work to develop opportunities to reduce the need for unnecessary conveyance to hospital through “hear and treat” and “see and treat”. <p>NWAS has also engaged positively with North West acute trusts to take actions to reduce hospital handover delays.</p> <p>Some of the work described above has been put on hold due to the unprecedented impact of COVID-19, and Commissioners have worked closely with NWAS across all its services lines (NHS 111, Paramedic Emergency Services and Patient Transport Services) to ensure that capacity for managing patients in need has been available. NWAS performance throughout the COVID-19 period has been exceptionally good with the Trust meeting all of its response targets. Commissioners will continue to work with NWAS through 2020/21 in continuing to deliver ARP performance and further work towards delivering transformation.</p>
		NWAS	00:07:00	00:07:54	00:07:23	↑

Area	Indicator	Org.	Target	2018-19	2019-20	Performance	No. of Excess Breaches	Comments
Mixed Sex Accom. ©	Breaches of same sex accommodation	BCCG	0	41	64	↓	64	Reporting on the number of mixed sex accommodation breaches was suspended in March 2020; therefore the number included within this report does not include March 2020 figures. The number of mixed sex accommodation breaches for Blackpool patients has increased in 2019/20 to sixty four (64) from forty one (41) in 2018/19. The majority of these breaches occurred at Lancashire Teaching Hospitals due to the lack of availability of specialist beds to step down to from critical care. Challenges in reducing the number of breaches remain due to the impact of flow and capacity across the Trust. The critical care bed demand remains high and whilst the Trust try to mitigate against what are in essence very short (in timescale) breaches, they prioritise the needs of the patients to undergo their procedure over potential breaches for mixed sex accommodation.
		BTH	0	0	0	↑	0	
Cancelled Ops (p)	Patients whose operations are cancelled, on or after the day of admission (including the day of surgery), for non-clinical reasons to be offered another binding date within 28 days.	BTH	0	21	38	↑	38	Reporting on the number of cancelled operations for non-clinical reasons and not offered another date within 28 days was suspended in March 2020; therefore the number included within this report does not include March 2020 figures. The thirty eight (38) cancelled operations not offered another binding date within 28 days in 2019/20 were due to the lack of available beds in scheduled care at Blackpool Teaching Hospitals as a result of the pressures of patient flow within the Hospital. All the work being undertaken to improve patient flow within the Hospital will also address this issue.
Mental Health ©	% of Mental Health patients on Care Programme Approach (CPA) discharged from hospital and followed up within 7 days	BCCG	95.00%	96.51%	97.03%	↑	0	Achieved.
Dementia ©	CCG's estimated prevalence for people over 65 with dementia against the CCG's actual dementia diagnosis rate	BCCG	66.70%	80.06%	79.16%	↓	0	Achieved.
Mental Health IAPT ©	IAPT access proportion rate (1.58% monthly)	BCCG	19.00%	16.03%	15.66%	↓	Breach information not currently available	The IAPT access proportion rate for Blackpool CCG has not achieved the target of 19.00% in 2019/20 and is 15.66% in March 2019. The number of referrals to the service in Blackpool have decreased; however access rates vary across the neighbourhoods. Whilst waiting times are consistently achieved there are internal waits for some specialties. There are plans in place to increase access in line with national targets, specifically focussing on long term conditions, to work with neighbourhoods to improve equity of access and integrate delivery models and also to reduce internal waiting times for clients. Awareness and engagement work is being conducted widely to improve access for patients which includes local radio advertisements and stands within supermarkets and shopping centres.
	IAPT recovery rate (50% monthly)	BCCG	50.00%	53.52%	47.20%	↓		
	The proportion of people that wait 6 weeks or less from referral to their first IAPT treatment appointment	BCCG	75.00%	96.00%	96.87%	↑	0	

Area	Indicator	Org.	Target	2018-19	2019-20	Performance	No. of Excess Breaches	Comments
	The proportion of people that wait 18 weeks or less from referral to entering a course of IAPT treatment.	BCCG	95.00%	100.00%	99.94%	↓	0	Achieved.
HCAI	C.Diff	BCCG	51	48	57	↓	9	The number of C-Difficile cases within the community has increased within 2019/20 to fifty seven. The CCG has engaged with care homes on the importance of hydration in order to prevent cases and continues to monitor and review all incidents for trends and themes.
		BTH	65	35	39	↓	0	
	MRSA	BCCG	0	1	1	↑	1	The hospital-onset MRSA bacteraemia was reviewed by the Unscheduled Care Division and the Post-infection-review panel where some learning points were identified for BTH. An MRSA Action Plan is in place and is monitored jointly by BTH and the Fylde Coast CCGs. A cause for the community-onset MRSA bacteraemia could not be identified. The patient was admitted to Aintree Hospital as an emergency admission and was shown to have a bacteraemia from the MRSA screening undertaken in the emergency department. There were no learning points identified from the post-infection-review process.
