		<ul style="list-style-type: none"><li>• Considerable progress has been made in the quality and robustness of services provided for vulnerable local children and families, but it is critical that the financial pressure arising from children in care and the cost of their placements are addressed. The Council's exposure to the external market in placements for children in care needs to be reduced and limited.</li><li>• Supported by ongoing investment by the Council and under the oversight of the Department for Education Commissioner and Advisor, over the past 15 months, Children's Social Care has been reviewed and redesigned. This has led to a much more robust, resilient service overall. It has also led to legacy issues being addressed, especially around long-term neglect and children and families with repeated cycles of Children's Social Care involvement. This, in turn, has led to an increase in the number of children in care from the late autumn of 2019 and into 2020.</li><li>• The growth in the number of children in care has substantially increased the pressure on Children's Services budgets, as the Council's own foster home capacity was exhausted. This has led to an increase in the number of children placed in foster homes purchased from independent fostering agency placements, in addition to increased fragility in placements and escalation of a steady number of young people into the most expensive placements of all - children's homes.</li></ul>
