---

Judith Many thanks for your email.

I wish to object to the revised application as I can see very little difference to the original application and as such the objections raised by residents and carried forward by me on their behalf remain very much the same.

This is a domestic premises and although other houses have been converted for business use I believe we are at saturation point in terms of the confines of that area especially given the very busy junction which would become further congested to an unacceptable level.

Many thanks in anticipation of your forwarding this to the relevant parties.

J

Dear Councillor Sloman,

I have attached the guidance notes for you. You do not need to use the portal to make an objection.

Many Thanks

Judith

Good Afternoon

I would like to raise an objection and am sure Cllr Callow will be of a similar mind. Will I need to do this through the portal ?

Many thanks

J
